

I_KZ_TERRITORY

File Geodatabase Feature Class

Tags

Territory, Kazakhstan

Summary

The purpose of the data is to be used in Wildlife Tracking and Reporting Actions for the Conservation of Species (TRACS) as a resource tool in TRACS Mapper. The geographic database of global administrative boundary provided the boundary shapefile to the U.S. Fish and Wildlife Service (USFWS) Wildlife and Sport Fish Restoration (WSFR) Wildlife Tracking and Reporting Actions for the Conservation of Species (TRACS) team to be used as a resource tool in TRACS Mapper. TRACS stands for Tracking and Reporting Actions for the Conservation of Species. Wildlife TRACS is the tracking and reporting system for conservation and related actions funded by the US Fish and Wildlife Services (USFWS), Wildlife and Sport Fish Restoration (WSFR) Program.

PROCESS STEP ►

WHEN THE PROCESS OCCURRED 2015-08-12 00:00:00

DESCRIPTION

FWS WSFR TRACS team received zipped shapefiles from geographic database of global administrative areas and upon unzipping the file, the shapefile was imported into a file geodatabase in order to run topology and generalize the data. The Check Geometry tool was used to determine if there were any geometry problems. No geometry problems were identified. Topology was created in ArcCatalog using the default rule Must Be Larger than Cluster Tolerance. There were no topology errors. The validated layer was generalized using the Simplify Polygon tool with the bend simplification and resolve topology error options. The generalized layer was exported to GCS WGS 84 and topology was recreated to confirm no additional errors were introduced. Two double fields were added to the attribute table for the web mapper program: Area_sq_m and Len_m. The geometry for these two fields was calculated using the World_Cylindrical_Equal_Area projection. Two integer fields were added to the attribute table for the web mapper program: IS_ACTIVE and IS_DELETED. IS_ACTIVE is populated with 1 (True) and IS_DELETED with 0 (False). The layer was imported to the SDE Enterprise Oracle database using the SDO_GEOMETRY spatial type.

OVERVIEW DESCRIPTION ►

ENTITY AND ATTRIBUTE OVERVIEW

The entity and attribute information provided here describes the tabular data associated with the data set. Please review the detailed descriptions that are provided (the individual attribute descriptions) for information on the values that appear as fields/table entries of the data set.

ENTITY AND ATTRIBUTE DETAIL CITATION

The entity and attribute information was generated by the individual and/or agency identified as the originator of the data set. Please review the rest of the metadata record for additional details and information.
