

Alabama Marine Resources Division SFR Boat Ramps

Shapefile

Tags

Alabama Marine Resources Division, Sport Fish Restoration, SFR, Boat Ramps

Summary

AMRD utilized Sport Fish Restoration funds to enhance/maintain these boat ramps to provide the public with a more fulfilling experience and to improve access to Alabama's aquatic resources. This file provides the location and name of each boat ramp facility that was impacted by the SFR program.

Description

This file provides the approximate locations (includes parking lots, ramps ,etc...) of six boat ramps in the Mobile Bay area that have been enhanced under the SFR program. The six boat ramps are located within Baldwin County, Alabama. The Boggy Point and Cotton Bayou ramps are located in the Orange Beach area, Fort Morgan and The Pines are located on the Fort Morgan Peninsula and provide direct access to Bon Secour Bay. Weeks Bay ramp (Viewpoint) is located at the mouth of Weeks Bay and Fish River (Bayview) is located at the mouth of Fish River at its' junction with east end of Weeks Bay.

DESCRIPTION

FWS WSFR TRACS team received zipped shapefiles from Alabama Marine Resources Division (AMRD) and upon unzipping the file, the shapefile was imported into a file geodatabase in order to run topology and generalize the data. The Check Geometry tool was used to determine if there were any geometry problems. No geometry problems were identified. Topology was created in ArcCatalog using the default rule Must Be Larger than Cluster Tolerance. There were no topology errors.

The validated layer was generalized using the Simplify Polygon tool with the bend simplification and resolve topology error options. The generalized layer was exported to GCS WGS 84 and topology was recreated to confirm no additional errors were introduced.

Two double fields were added to the attribute table for the web mapper program: Area_sq_m and Len_m. These fields were populated using "Calculate Geometry" with coordinate system "World_Cylindrical_Equal_Area". Three integer fields were added to the attribute table for the web mapper program: SOURCE_ID, IS_ACTIVE and IS_DELETED. IS_ACTIVE was populated with 1 (True) and IS_DELETED with 0 (False). SOURCE_ID is a unique qualifier that is extracted from the state data provided. A text field was added to the attribute table for the web mapper program: SOURCE and was populated with the table_name.

The layer was imported to the SDE Enterprise Oracle database using the SDO_GEOMETRY spatial type.
