

## Nevada Regions (2014)

SDE Feature Class

Tags

Nevada Regions

### Summary

The Nevada Department of Wildlife provided the Nevada regions shapefile to the U.S. Fish and Wildlife Service (USFWS) Wildlife and Sport Fish Restoration (WSFR) Wildlife Tracking and Reporting Actions for the Conservation of Species (TRACS) team to be used as a resource tool in TRACS Mapper.

### Description

Nevada Department of Wildlife Regions

### Credits

Nevada Department of Wildlife

### Use limitations

There are no access and use limitations for this item.

### Extent

**West** -120.005749    **East** -114.039654  
**North** 42.002196    **South** 35.002080

### Scale Range

**Maximum (zoomed in)** 1:5,000  
**Minimum (zoomed out)** 1:150,000,000

#### DESCRIPTION

FWS WSFR TRACS team received zipped shapefiles from Nevada Department of Wildlife and upon unzipping the file, the shapefile was imported into a file geodatabase in order to run topology and generalize the data. The Check Geometry tool was used to determine if there were any geometry problems. No geometry problems were identified. Topology was created in ArcCatalog using the default rule Must Be Larger than Cluster Tolerance. There were no topology errors.

The validated layer was generalized using the Simplify Polygon tool with the bend simplification and resolve topology error options. The generalized layer was exported to GCS WGS 84 and topology was recreated to confirm no additional errors were introduced.

Two double fields were added to the attribute table for the web mapper program: Area\_sq\_m and Len\_m. Two integer fields were added to the attribute table for the web mapper program: IS\_ACTIVE and IS\_DELETED.

The layer was imported to the SDE Enterprise Oracle database using the SDO\_GEOMETRY spatial type.
