

ODFW Regions Pre-2014

File Geodatabase Feature Class

Tags

boundaries oregon ODFW districts, pre-2014

Summary

Until 2014 the ODFW had four administrative districts.

Description

This dataset contains ODFW regional and watershed district boundaries.

Credits

ODFW Regions and Watershed District Boundaries

Use limitations

This dataset is deemed accurate by ODFW at time of creation and at scale (1:100k) created. It is possible that the boundaries can change over time.

Extent

West	-124.806109	East	-116.417080
North	46.282588	South	41.923242

Scale Range

Maximum (zoomed in)	1:5,000
Minimum (zoomed out)	1:150,000,000

WHEN THE PROCESS OCCURRED 2014-12-01 00:00:00

DESCRIPTION

FWS WSFR TRACS team received zipped shapefiles from Oregon Dept of Fish and Wildlife and upon unzipping the file, the shapefile was imported into a file geodatabase in order to run topology and generalize the data. The Check Geometry tool was used to determine if there were any geometry problems which there were none. Topology was created in ArcCatalog using the default rule Must Be Larger than Cluster Tolerance. There were no topology errors.

The validated layer was generalized using the Simplify Polygon tool with the bend simplification and resolve topology error options. The generalized layer was exported to GCS WGS 84 and topology was recreated to confirm no additional errors were introduced.

Two geometry fields were added to the attribute table for the web mapper program: Area_sq_m and Len_m. Two integer fields were added to the attribute table for the web mapper program: IS_ACTIVE and IS_DELETED.

The layer was imported to the SDE Enterprise Oracle database using the SDO_GEOMETRY spatial type.
