

ODFW Wildlife Management Units

File Geodatabase Feature Class

Tags

wildlife, management units, Oregon, ODFW

Summary

For the purpose of wildlife management.

Description

Oregon Department of Fish and Wildlife management unit boundaries.

Fields:

UNIT_NUM Unite Number

UNIT_NAME Unit Name

Credits

Oregon Department of Fish and Wildlife

Use limitations

Boundaries may not be altered without permission of the Oregon Department of Fish and Wildlife.

Extent

West	-124.807339	East	-116.420178
North	46.289081	South	41.920020

Scale Range

Maximum (zoomed in)	1:5,000
Minimum (zoomed out)	1:150,000,000

DESCRIPTION

FWS WSFR TRACS team received zipped shapefiles from Oregon Dept of Fish and Wildlife and upon unzipping the file, the shapefile was imported into a file geodatabase in order to run topology and generalize the data. The Check Geometry tool was used to determine if there were any geometry problems and the 18 errors were corrected using the Repair Geometry tool. Topology was created in ArcCatalog using the default rule Must Be Larger than Cluster Tolerance. There were no topology errors.

The validated layer was generalized using the Simplify Polygon tool with the bend simplification and resolve topology error options. The generalized layer was exported to GCS WGS 84 and topology was recreated to confirm no additional errors were introduced.

Two geometry fields were added to the attribute table for the web mapper program: Area_sq_m and Len_m. Two integer fields were added to the attribute table for the web mapper program: IS_ACTIVE and IS_DELETED.

The layer was imported to the SDE Enterprise Oracle database using the SDO_GEOMETRY spatial type.
